EDUCATION

Georgia State University,

August, 2006

Atlanta, GA

Computer Science (Magna Cum Laude)

National Dean's List, Golden Key Honour Society, ACM Member

Certifications: SCJP, Comptia A+, MCSE (NT4), MCP (2003), Epic Clarity Data Model, Resolute Professional Billing

EXPERIENCE

12/2009 - Present

Software Developer

Piedmont Hospital

Atlanta, GA

Created .NET web applications for MojoPortal CMS. Maintained QA, DEV and PROD websites for MojoPortal and developed database procedures to automate pulling data from MojoPortal. Setup new DotNetNuke portal and migrated existing MojoPortal applications. Created database scripts to migrate users, roles, and custom properties to DNN. Fixed bugs and developed portlets for Physician CIT portal using Java, Groovy, and Grails. Created and maintained existing ETL processes for data warehouse and kept physician, patient and clinic data from sources such as EDI 837P 4010 and 5010 files, CSV files, NSF files, and NextGen databases. Assisted physicians and practice managers in calculating CMS PQRS scores and Press Ganey Patient Satisfaction scores that were being displayed in the CIT portal. Server projects I setup for Piedmont include: wiki (Atlassian Confluence and Jira), SVN, SFTP server, and Hudson CI server.

10/2006 - 11/2009

.NET Programmer

Elavon

Atlanta, GA

Created web apps for intranet portal using VB.NET & ASP.NET to generate reports from SQL Server 2000/2005 databases. Wrote custom C# applications to automate XML and report file processing and saved hours of manual data entry. Supported and updated document management intranet application to store, retrieve, and update legal documents in PDF format. Supported internal compensation system and created stored procedures to calculate compensation pay for sales people using SQL Server 2005 back-end. Responsible for web portal support and portal administration, including end user support. Maintained and supported Lead Referral site written on DotNetNuke platform with SQL 2005 and SQL Reporting Services back-end.

5/2006 - 10/2006

Java Programmer (Contract)

BlueLinux (Georgia Pacific's Building Material Division)

Marietta, GA

Fixed bugs in existing Java Swing applet and added new deck design capabilities through the GUI and passed these new modifications to the C# web service via XML. Kept source code updated in Visual Source Safe. Created sequence diagrams and Gantt charts for data conversion process. Migrated deck building Java applet, C# web service, and C++ 3D graphics software from 3rd party hosting company to BlueLinux servers. Set up internal development server to run IIS, ASP.NET, and .NET Framework 2.0, then wrote test scripts for QA testing.

12/2004 - 4/2006

Support Technician (Contract/Co-op)

Georgia Pacific

Atlanta, GA

Wrote VB6 apps to automate user database imports. Wrote VB.NET web pages to export database XML files and display user database reports for auditing. Used HTML and CSS to design support group's internal web portal. Supported administrators using Kronos Workforce Central with time entry, reporting, and system access problems.

** Previous skills include: Network Engineer, QA Tester, and Helpdesk Technician. Detailed information of these positions is available upon request.

SKILL SETS:
